

## ASX ANNOUNCEMENT

### VIRTUS HEALTH LIMITED (ASX: VRT)

2 June 2015

### TRADING UPDATE

---

Sydney, Australia – Virtus Health (“Virtus”, ASX: VRT), Australia’s largest IVF provider, is revising its earnings forecast, based on current trading activity and expects to deliver modest growth in net profit after tax (NPAT) for the financial year ending 30 June 2015.

In February, Virtus issued guidance it would achieve NPAT growth in the low to mid-teens before non-recurring items of \$2.1 million. Now, Virtus expects to achieve low to mid-single digit percentage growth in NPAT before non-recurring items of \$2.3 million as a result of lower than forecast cycles.

Growth has been impacted by the following factors:

- **NSW cycle growth:** Although market growth in NSW has improved in the three months to 30 April by 6% compared to prior year comparatives (Source: Medicare Statistics for item numbers 13200,13201,13202), Virtus has not achieved comparable cycle growth and believes the market growth is attributable to the bulk bill provider in NSW.
- **Maroubra Clinic storm damage:** Virtus has experienced some cycle volume disruption this quarter due to the temporary closure of its Maroubra facility in Sydney at the end of April as a result of storm damage. Current patient care has continued although new patient consulting activity is not expected to return to normal levels until the facility reopens in August 2015.
- **Ongoing weak conditions in VIC and QLD:** Virtus has lost a small amount of market share in Victoria and Queensland in the three months to 30 April. In addition the state markets have remained weak with Victorian market growth at 1% and Queensland market growth at negative 4% against prior year comparatives; and
- **Singapore Clinic Volumes:** The start-up volume of our operation in Singapore has been slower than anticipated; this will result in a second half forecast EBITDA loss of approximately \$1,000,000.
