

## Digital Health Integration Engineer

**Contract Term: 12 Months**

**Melbourne Based preferable with flexible remote working options**

---

### Who are we?

Virtus Health Limited (ASX: VRT) is Australia's largest provider of assisted reproductive services. We are a collaboration of administration staff, nurses, fertility specialists, scientists, and businesspeople who are all committed to continuously improving the services we provide to people hoping to create a family. In Australia, we run 48 Fertility Clinics, 10-day hospitals and the boutique Virtus diagnostic service. We are also the largest provider of assisted reproductive services in Ireland, Denmark and have a growing presence in Singapore and United Kingdom. We see a future where everyone in the community has the opportunity to create a family.

Patient care, scientific and clinical leadership, and a passion for making a difference to people's lives is always at the forefront of our minds. Collaboration, agility, and the curiosity to investigate new ideas is how we will continue to grow as a market leader.

### About the role

This is a great opportunity for an experienced Integration Engineer to work autonomously in a supportive and professional environment, integrating systems and devices that will ensure improved operations for staff and external facing interactive engagement for patients. You will be a key member of the Digital Health team and play an important role leading the integration activities for clinical applications, biomedical devices, practice management systems, pathology labs, pharmacies, and imaging providers to integrate with the Precision Digital Fertility Platform (PFDP) which will provide a welcome uplift of technology across the organisation.

### About you

You are someone who wants to be part of a team that is ambitious to grow a business that makes a difference. You build relationships and manage multiple stakeholders with ease. You are proactive in your approach and like to challenge the status quo.

### As our ideal candidate, you will have:

- BS in Computer Science, IT, Information Management, or a related field
- 5 + years of experience working in application integration roles
- A thorough knowledge of application integration and API management
- Proven experience in HL7 integration, scoping, designing, testing and deploying HL7
- Experience with FHIR
- Strong understanding of API gateways and event-based systems
- Experience with health care application integration (EMR, LIMS, biomedical devices) is preferable
- Strong analytical skills with the ability to collect, organise, analyse, and disseminate significant amounts of information with attention to detail and accuracy
- Excellent communication and strong relationship building and stakeholder engagement skills
- Accuracy and attention to detail

- Problem-solving capabilities
- Excellent time management skills
- Ability to work autonomously, but in a team setting

### **Diversity**

We encourage you to bring your 'whole self to work'. Virtus Health is a safe and inclusive workplace.

We value the visible and invisible qualities that make you who you are. We expect our workforce to align with our diversity expectations and programs.

Working at Virtus means you are on board with our journey, you will show respect, understanding and kindness to other regardless of ethnicity, sexuality, identity, or any other protected attribute.

If you are interested in this opportunity, please send your CV and cover\* letter to Kerri McAllen at: [Kerri.mcallen@virtushealth.com.au](mailto:Kerri.mcallen@virtushealth.com.au).
